

JF-1D Wifi Stress Meter

The JF-1wifi stress meter is applied for measuring surface stress of thermally toughened glass, heat-strengthened glass and annealed glass on the tin side. The App can be installed in IOS and Android phone System. The phone connects the device network via device Wifi and no extra wifi server is needed.

Features:

- Multi phones support
- Easy operation
- Portable
- Auto & Manual

Code and standard:

ASTM C 1048, ASTM C 1279, EN 12150-2, EN 1863-2

Specification:

Range	15~300MPa
Battery	Two 18650 battery
Resolution	2.3MPa
Dimension	120*101*46mm
Weight	0.6 kg
